

COLEGIO DE LA SALLE

VEDADO - HABANA

CUBA

April 1st 1946

My Dear Teacher,

From the paradise of sun  
and flowers where I hide, my  
mind wanders sometimes along a  
meridian and tries to hope that all  
is going in an encouraging  
manner. I understand, that this  
is a time of transition and that  
you are marking time.

I have laid my hands on  
two good *Mercurycas* roots, 5 inches  
diameter and 18 inches long. I will  
send them a little later when cold  
is less dangerous. I am sure these

are exactly of the size we want.

Next week I will be in the Province of Ontario and will send you seeds of industry & hedges.

Hope your family is well. Extend my best wishes to all at home and at the Garden when you are a good father to all.

Miss Gammon was very much touched by your kindness to her during Easter time. I think she is an earnest and very devoted person, and that she believes that

Be courageous my dear friend, and go on with what no doubt be the great work of your life!

Truly yours

J. M. Victoria
