

Montreal, Sept. 16th, 1932.

Mr. H. Tauscher,
170, Truman Ave.
Nepera Park, N.Y.

My Deear Mr. Tauscher,

If I do not write oftener it is not for lack of interrest, but just because everything is going slow.

All I could obtain for the time being was to send Mr. Keroack to you. Mr. Keroack expressed a great deal of satisfaction about his visit - and I am very glad at that. If the thing is really to succeed, it will be in the future by the hearty cooperation of the three of us.

The "pavillon" is being built, and it will be all for this year. I am watching the opportunity to make a step forward in having you here to work at the general plan. When, I do not know. But I am confident. In the mean time I will try to have the plough put un the proposed nursery, and to get the leaf-mold. I am sending you the plan for the corner that Mr. Keroack has drawn after his return from New York. Mr. Keroack preferred that I send it myself.

I hope you understand why I am reluctant to have you work on that scheme in the present state of uncertainty. I can not take any responsibility as far as expenses are concerned. On the other hand, I think I am an honest person, and I want to give full credit to people for their work.

21 - Tauscher, H. fr Mame-Victorin, B.

I hope to have the opportunity to make a short trip to New York before long. We will then talk the matter over.

In the mean time, the only thing to do, is to wait patiently and keep the flame burning.

Very truly yours,
