Genus WEIGELA Species (or most resembled species in hybrid, or hybrid group) FLORIDA Variety or subspecies _____

Cultivar name submitted for registration: POLKA

If Sport: Name of parent _____ Yr. First Observed: _____

Yr. First Propagated: _____ No. of Yrs. Flowered on Propagation: _____

Bloomed 100% true (or retained vegetative characteristics of sport)?

If seedling: Age 6 Yr. First Flowered: 1982 Name of Plant or Cultivar

from which seed was taken (if known) [Bristol Snowflake X (Purpurea X Centennial)] Seedling

Male Parent (if known): (Abel Carrière X Rumba) seedling

Originated at: Plant Research Centre Date Selected (Discovered): 1983

Originator: Felicitas Svejda Address: Agriculture Canada, Ottawa, Ont. KIA 0C6

Introducer: Plant Research Centre Address: as above

Yr. of Commercial Introduction: 1987 Has the name and description of this cultivar been published? Will be published

If so, by whom, where and when? HortScience, 1987

If Patented: Plant Patent No.: _____ Date: _____ Assignee: _____

If Trademarked: Trademark No.: _____ Date: _____ Yr. Introduced: _____

The plant has been compared with and may be distinguished from related cultivars (varieties) by the following characteristic features and to the best of my knowledge represents a new and distinct cultivar (variety):

'Polka' is comparable in hardiness to 'Rumba', the hardiest cultivar in the test in Ottawa (zone 5a) but it has a longer flowering season. Shrub bushy, 1-1.2 m high, 1.2-1.5 m diameter. Flowers pink, outer corolla R.H.S. Colour Chart 73A-C, inner corolla 73D, yellow throat, 11A; diameter 3.5 cm, corolla length 4.5 cm. Foliage abundant, healthy, yellow-green, 147A. Leaves 6 cm long, 3.5-4 cm wide, ovate, acuminate, dentate.

Zones or limits of hardiness: Should survive in Zone 3a (Ouellet, C.E. and L.C. Sherk, 1967.

Adaptation to soils or location: Map of Hardiness Zones in Canada. Canada Dept. Agr. Publ. 5003).

Herbarium specimen sent: Agriculture Canada Biosystematics Res. Inst. Photo sent: Color Slide attached.

APPLICATION FOR REGISTRATION

The undersigned hereby applies to register the following cultivar with the Canadian Ornamental Plant Foundation:

Species (Botanical) Name WEIGELA FLORIDA

Suggested Cultivar Name POLKA

Alternative Name

Description in English or French, including where applicable, classification, details of colour, chromosome data, etc. (Use separate sheet if necessary).

'Polka' is comparable in winter survival to 'Rumba' but it has a longer flowering season. Shrub bushy, 1-1.2 m high, 1.2-1.5 m diameter. Flowers pink, outer corolla ~~73A-G~~, inner corolla ~~73D~~, yellow throat, ~~11A~~; diameter ~~3.5~~ cm, corolla length 4.5 cm. Foliage abundant, healthy, yellow-green, ~~147A~~, leaves 6 cm long, 3.5-4 cm wide, ovate, acuminate, dentate.

Parentage Bristol Snowflake X (Purpurea X Centennial) X (Abel Carrière X Rumba)

Awards received, with dates

Has cultivar been registered with international authority? If so, give date

Name and address of authority ARNOLD ARBORETUM, JAMAICA PLAIN, MASS. 02130 U.S.A.

Has cultivar been distributed in any way? No If so, give details

If not, when will cultivar be available for distribution? Fall 1987

Dear Dr. Svejda:

Many, many thanks for the completed registration forms for your new Philadelphus, Forsythia, and Weigela cultivars as well as for the reprints and the very nicely produced color booklet.

You may consider the new cultivar names registered, and I will look forward to receiving reprints from HortScience when your articles have been published.

With many thanks and with my best wishes for the New Year, I am,

Yours sincerely,

Stephen A. Spongberg

APPLICATION FOR REGISTRATION

The undersigned hereby applies to register the following cultivar with the Canadian Ornamental Plant Foundation:

Species (Botanical) Name WEIGELA FLORIDA

Suggested Cultivar Name MINUET

Alternative Name

Description in English or French, including where applicable, classification, details of colour, chromosome data, etc. (Use separate sheet if necessary). During the past 7 years, 'Minuet' has been as hardy as 'Dropmore Pink' and 'Centennial' ^{at Ottawa?} It flowers freely from 3-5 weeks. 'Minuet' has a dense shrub, reaching 0.5-0.75 m in height and diameter, with excellent foliage cover. The foliage is green with purple tint (R.H.S. Colour Chart 147A and 187A). Leaves are ovate, acuminate, 5 cm long, 2.5 cm wide, with serrate edges. The flowers are fragrant, 3.5 cm in diameter, 2-tone. The outer corolla is magenta rose, 64A-64B. The inner petal lobes vary from lilac-purple to magnolia purple, 70B-70C. The throat is yellow, 11A.

Parentage W. florida cvs. Purpurea X Dropmore Pink

Awards received, with dates
